1. With regard to the **elements** of the international application (Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)):

	Des	cription, Pages							
	1-13	3	as originally filed						
	Clai	ims, Numbers	1						
	1-10		filed with telefax on 26.05.2004						
2.	With	n regard to the langua	age, all the elements marked above were available or furnished to this Authority in the ernational application was filed, unless otherwise indicated under this item.						
	The	se elements were ava	ailable or furnished to this Authority in the following language: , which is:						
		the language of a tra	nslation furnished for the purposes of the international search (under Rule 23.1(b)).						
		• •	ication of the international application (under Rule 48.3(b)).						
		the language of a tra Rule 55.2 and/or 55.3	nslation furnished for the purposes of international preliminary examination (under 3).						
3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, international preliminary examination was carried out on the basis of the sequence listing:									
		contained in the inter	national application in written form.						
		filed together with the	e international application in computer readable form.						
		furnished subsequer	tly to this Authority in written form.						
		furnished subsequer	tly to this Authority in computer readable form.						
		The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.							
•		The statement that the listing has been furni	ne information recorded in computer readable form is identical to the written sequence shed.						
4.	The	amendments have re	esulted in the cancellation of:						
		the description,	pages:						
		the claims,	Nos.:						
		the drawings,	sheets:						
5.			established as if (some of) the amendments had not been made, since they have go beyond the disclosure as filed (Rule 70.2(c)).						
	•	(Any replacement sh	eet containing such amendments must be referred to under item 1 and annexed to this						
6.	Add	litional observations, i	f necessary:

INTERNATIONAL PRELIMINARY International application No. PCT/EP 03/07254 EXAMINATION REPORT - SEPARATE SHEET

1) The present application relates to methods of control of undesirable plants and methods for safening a desirable crop from the effects of a herbicide, the methods involving application of dinitroaniline herbicides in microencapsulated form.

2) Re Item V

2.1 Novelty (Art. 33(2) PCT)

No document in the available prior art discloses methods as presently claimed. The subject-matter of claims 1-10 is therefore regarded as novel.

2.2 Inventive Step (Art. 33(3) PCT)

None of the cited documents or combination thereof suggests the claimed herbicidal or safening methods. Furthermore, the safening effect observed for microencapsule formulations of dinitroaniline herbicides with regard to their corresponding EC-formulations is surprising. Thus, the subject-matter of claims 1-10 is regarded as inventive.

2.3 Industrial applicability (Art. 33(4) PCT)

Is acknowledged for the whole set of claims.

3) Further comments:

- 3.1 The units employed in examples 5-9 are not the ones stipulated by Rule 10.1(a) PCT. Thus, they should be additionally expressed in terms of the units of the Metric System.
- 3.2 The vague statements in the description on page 2, lines 34-38 and on page 13, lines 9-15 imply that the subject-matter for which protection is sought may be different to that defined by the claims, thereby resulting in lack of clarity (Article 6 PCT) when used to interpret them.
- 3.3 The sentences on pg. 4, I. 16-17 and on pg. 13, I. 5-7 should be deleted (cf. Article 5 PCT and PCT-ISPE-Guideline 4.26).

What is claimed is:

- 1. A method for the preemergence control of undesirable plant species comprising applying as a tank mix to soil containing seeds of the undesirable plant a herbicidally effective amount of a microcapsule composition comprising a dinitroaniline compound, with a herbicide formulation comprising diflufenzopyr or dicamba or diflufenzopyr and dicamba.
- The method of claim 1 wherein the microcapsule has a median diameter from 3
 micrometers to 10 micrometers.
 - The method of claims 1 to 2 wherein the dinitroaniline compound is pendimethalin or trifluralin.
- 15 4. The method of claims 1 to 3 wherein the undesired plant is crabgrass.
 - 5. A method for the control of undesirable plants in the presence of desirable crop plants which comprises applying to soil containing the desirable plants and seeds of the undesirable plant a herbicidally effective amount of a microcapsule composition comprising a dinitroaniline compound.
 - 6. The method of claim 5 wherein the microcapsule has a median diameter from 3 micrometers to 10 micrometers.
- 25 7. The method of claims 5 to 6 wherein the dinitroaniline compound is pendimethalin or trifluralin.
 - 8. The method of claims 5 to 7 wherein the undesired plant is crabgrass.
- 30 9. The method of claims 5 to 8 wherein the desired plant is lettuce, tomatoes or corn.
- A method for safening a desirable crop from the effects of a herbicide applied to control undesirable plants in the presence of the desirable crop plants which comprises applying a herbicidally effective amount of a microcapsule composition comprising a dinitroaniline compound.
